

Index of Authors, Volume 21, 2020

Abd Elghaffar A.M., *see under Hassan A. S.*

Abdollahnezhad K., *see under Marganpoor S. H.*

Abu Bakar M.A., *see under Alhyasat K.*

Abuzaid Ali H., *Detection of outliers in univariate circular data by means of the Outlier Local Factor*

Adebola F. B., *see under Adediran A. A.*

Adediran A. A., *Unbiased estimator modelling in unrelated dichotomous randomized response*

Adepoju A. A., *Change Point Detection in CO₂ Emission-Energy Consumption Nexus using Recursive Bayesian Algorithm*

Agiwal V., *A Bayesian Analysis of complete multiple breaks in panel autoregressive (CMB-PAR(1)) Time Series Model*

Alabid A., *see under Hurairah A.*

Alam M. J., *Applying data synthesis for longitudinal business data across three countries*

Alhyasat K., *Power size biased two-parameter Akash distribution and its application to glass of the aircraft windows*

Alizadeh M., *see under Marganpoor S. H.*

Almetwally E. M., *A New Generalization of the Pareto Distribution and its Applications*

Al-Jararha J., *Horvitz-Thompson estimator based on the auxiliary variable*

Al-Omari A., *see under Alhyasat K.*

Arshad R. M. I., *The Gamma Kumaraswamy-G family of distributions: Theory, Inference and Applications*

Assar S. M., *see under Hassan A. S.*

Awe O. O., *see under Adepoju A. A.*

- Balgobin Nandram**, *see under Yin J.*
- Bera S.**, *High dimensional, robust, unsupervised record linkage*
- Błażej M.**, *see under Kotlewski D.*
- Bondaruk T.**, *see under Osaulenko O.*
- Bonnery D.**, *An evaluation of design-based properties of different composite estimators*
- Burgard J. P.**, *A generic business process model for conducting microsimulation studies*
- Bwanakare S.**, *Predicting Polish Transport Industry Equilibrium Characteristics as an Inverse Problem: An Entropy Econometrics Model*
- Cai S.**, *Effective transformation-based variable selection under two-fold subarea models in small area estimation*
- Chatrchi G.**, *see under Cai S.*
- Chatterjee S.**, *see under Bera S.*
- Chaudhuri A.**, *see under Pal S.*
- Cheng Y.**, *see under Bonnery D.*
- Chesneau Ch.**, *see under Arshad R. M. I.*
- Chwila A.**, *On the choice of the number of Monte Carlo iterations and bootstrap replicates in empirical best prediction*
- Cierpień-Wolan M.**, *see under Bwanakare S.*
- Dehnel G.**, *Robust estimation of wages of small enterprises: the application to Poland's districts*
- Di Consiglio L.**, *A comparison of area level and unit level small area models in the presence of linkage errors*
- Dieckmann H.**, *see under Burgard J. P.*
- Domański Cz.**, *Comparison of some tests for univariate normality based on measures of the moments*
- Dostie B.**, *see under Alam M. J.*
- Drechsler J.**, *see under Alam M. J.*
- Duda J.**, *Modelling Bid-Ask spread conditional distributions using hierarchical correlation reconstruction*

Dumitrescu L., *see under Cai S.*

Eideh A., *Parametric Prediction of Finite Population Total under Informative Sampling and Nonignorable Nonresponse*

Ewemooje O.S., *see under Adediran A. A.*

Gershunskaya J., *Discussion*

Ghosh M., *Small area estimation: its evolution in five decades; & Rejoinder*

Gurgul H., *see under Duda J.*

Haj Ahmad H. A., *see under Almetwally E. M.*

Han Y., *Discussion*

Hassan A. S., *Statistical Properties And Estimation Of Power Transmuted Inverse Rayleigh Distribution*

Hurairah A., *Beta transmuted Lomax distribution with applications*

Ibrahim K., *see under Alhyasat K.*

Jamal F., *see under Arshad R. M. I.*

Jan T.R., *see under Para B. A.*

Just M., *see under Łuczak A.*

Kedem B., *see under Zhang X.*

Kotlewski D., *Development of KLEMS accounting implemented in Poland*

Krause J., *see under Burgard J. P.*

Krzyśko M., *Measuring and testing mutual dependence of multivariate functional data*

Kumar J., *see under Agiwal J.*

Lahiri P., *Preface & A general Bayesian approach to meet different inferential goals in poverty research for small areas & see under Bonnery D.*

Leśkow J., *see under Urbański S.*

Li Y., *Discussion*

Łuczak A., *Positional MEF-TOPSIS method in the assessment of the development level of complex economic phenomena for territorial units*

Marganpoor S. H., *Generalized odd Frechet family of distributions: properties and applications*

- Marszałek M.**, *The unobserved economy - invisible production in households.
The household production satellite account and the national time transfer accounts*
- Merkle H.**, *see under Burgard J. P.*
- Molina I.**, *Discussion*
- Momotiuk L.**, *see under Osaulenko O.*
- Motoryn R.**, *Asymmetry of foreign trade turnover in Ukraine and Poland*
- Moura F. A. S.**, *see under Neves A. F. A.*
- Münnich R.**, *see under Burgard J.P.*
- Neufang K. M.**, *see under Burgard J.P.*
- Neves A. F. A.**, *Skew normal small area time models for the Brazilian annual service
sector survey*
- Newhouse D.**, *Discussion*
- Niwitpong Suparat**, *see under Thangjai W.*
- Okrasa W.**, *see under Zawada P.*
- Osaulenko O.**, *Ukraine's State Regulation of the Economic Development of Territories
in the Context of Budgetary Decentralization*
- Pal S.**, *How privacy may be protected in optional randomized response surveys*
- Palma A.**, *see under Rossa A.*
- Para B.A.**, *Poisson weighted Ishita distribution: model for analysis of over-dispersed
medical count data*
- Patra D.**, *see under Pal S.*
- Pfeffermann D.**, *Discussion*
- Prasad Sh.**, *Some linear regression type ratio exponential estimators for estimating
the population mean based on quartile deviation and deciles*
- Prykhodko K.**, *see under Motoryn R.*
- Pyne S.**, *see under Zhang X.*
- Rai P. K.**, *Alternative approach for moments of order statistics from weibull
distribution*
- Ranjbar V.**, *see under Marganpoor S. H.*

- Rao J. N. K.**, *Discussion; see under Cai S.*
- Rossa A.**, *Predicting parity progression ratios for young women by the end of their childbearing life*
- Saegusa T.**, *Confidence bands for a distribution function with merged data from multiple sources*
- Schmaus S.**, *see under Burgard J. P.*
- Silva D. B. N.**, *see under Neves A. F. A.*
- Singh S. K.**, *see under Yadav A. S.*
- Singh U.**, *see under Yadav A. S.*
- Sirohi A.**, *see under Rai P. K.*
- Shangodoyin D. K.**, *see under Agiwal V.*
- Shanker R.**, *A new quasi Sujatha distribution*
- Shukla K. K.**, *see under Shanker R.*
- Smaga Ł.**, *see under Krzyśko M.*
- Sulaiman M.**, *see under Al-Jararha J.*
- Suntornchost J.**, *see under Lahiri P.*
- Syrek R.**, *see under Duda J.*
- Szczepocki P.**, *Application of iterated filtering to stochastic volatility models based on non-Gaussian Ornstein-Uhlenbeck process & see under Domański Cz.*
- Ślusarczyk B.**, *see under Motoryn R.*
- Tahir M. H.**, *see under Arshad R. M. I.*
- Tailor R.**, *see under Yadav R.*
- Thangjai Warisa**, *Comparing Particulate Matter Dispersion in Thailand using the Bayesian Confidence Intervals for Ratio of Coefficients of Variation*
- Tharshan R.**, *A comparison study on a new five-parameter generalized Lindley distribution with its sub-models*
- Tuoto T.**, *see under Di Consiglio L.*
- Urbański S.**, *Using the ICAPM to estimate the capital cost of stock portfolios: empirical evidence on the Warsaw stock exchange*

Vilhuber L., *see under Alam M. J.*

Warchalowski J., *see under Zawada P.*

Wawrowski Ł., *see under Dehnel G.*

Wijekoon P., *A comparison study on a new five-parameter generalized Lindley distribution with its sub-models*

Wójcik S., *With a random route to goal: theoretical background and application in tourism survey in Poland*

Wywiał J. L., *Estimating the Population Mean using a continuous Sampling Design Dependent on an Auxiliary Variable*

Yadav A. S., *Statistical properties and different estimation methods for weighted inverted Rayleigh distribution*

Yaday R., *Estimation of Finite Population Mean using two auxiliary variables under stratified Random Sampling*

Yin J., *A Bayesian Small Area Model with Dirichlet processes on the responses*

Safari-Katesari H., *Count copula regression model using generalized beta distribution of the second kind*

Zaman T., *New family of exponential estimators for the finite population mean*

Zaroudi S., *see under Safari-Katesari H.*

Zawada P., *Flow management system for maximising business revenue and profitability*

Zhang X., *Model selection in radon data fusion*

Żądło T., *see under Chwila A.*
