A SIMPLE MANUSCRIPT TEMPLATE FOR THE STATISTICS IN TRANSITION JOURNAL

First Author[1], Second Author[2]

ABSTRACT

This is a simple template file facilitating the preparation of manuscripts for the Statistics in Transition journal using LATEX. Please enter your abstract text here.

Key words: template, article, journal.

1. The first section

The first section starts here.

1.1. Citations

Refer to the literature using Harvard convention, as exemplified by the following articles of Gamrot (2012, 2013), a proceedings paper of Kennickell (1997) or a book of Särndal, Swensson and Wretman (1992).

1.2. Formulae

Expressions should not exceed the text width and may be entered as follows:

$$V(\hat{t}) = \sum_{i,j \in U} \check{y}_i \check{y}_j \Delta_{ij} \tag{1}$$

$$\hat{V}(\hat{t}) = \sum_{i,j \in s} \check{y}_i \check{y}_j \frac{\Delta_{ij}}{\pi_{ij}} \tag{2}$$

1.3. Tables

An example table:

Table 1. Some nicely looking numbers

U	W	X	Y	Z
1001	1002	1003	1004	1005
1006	1007	1008	1009	1000
1001	1002	1003	1004	1005
1006	1007	1008	1009	1000
