

CONTENTS

Submission information for authors.....	III
From the Editor.....	VII

Invited paper

Kokoszka P., Lin M., Wang H., Hayne S., Statistical risk quantification of two-directional internet traffic flows	1
---	---

Research articles

Gurgul H., Syrek R., Mutual information between Polish subindexes – the use of copula entropy around the time of the COVID-19 pandemic.....	23
Gaire A. K., Gurung Y. B., Skew Log-logistic distribution: properties and application	43
Sahoo N., Jhankar S. K., A chain ratio-type exponential estimator for population mean in double sampling	63
Oladugba A. V., Babatunde O. T., Improved calibration estimation of population mean in stratified sampling using two auxiliary variables	77
Palma A., Kałuza-Kopias D., Inter-voivodship migration in Poland in the 2000–2020 period based with Markov chain analysis	93
Djafar N. M., Fauzan A., Implementation of K-Nearest Neighbor with oversampling technique on mixed data for classification of household welfare status	109
Makhdom I., Abbas P., On Bayesian inference of reliability parameter in Burr-type XII model based on imprecise data: a survey on fuzzy modeling	125
Kisielińska J., Estimation of quantiles with the exact bootstrap method.....	145

Research Communicates and Letters

Belhamra T., Zeghdoudi H., Raman V., Reliability for Zeghdoudi distribution with an outlier, fuzzy reliability and application.....	167
Rai P. K., Singh S., Composite estimators for domain estimation and sensitivity performance interval of their weights.....	179
About the Authors	191
