Original Research Papers

Swanson D. A., Tayman J. , On using ARIMA model confidence intervals applied to population projections based on the components of change: a case study for the world population	1
Girul A. , Factors determining the formation of degraded areas in local government units and the effectiveness of revitalisation activities	15
Khazaei S., Bohlourihajjar S. , Bayesian nonparametric model for weighted data using mixture of Burr XII distributions	35
Kumar J., Nain A. , Exploring new mixtures of distribution to model a skewed and heavy tailed data	55
Kubus M., Mach Ł., Misiurski P. , Application of the nonlinear splines model to forecast changes in the construction costs index	69
Agu F. I. , The truncated Schröter recursive algorithm for the computation of aggregate claim amounts	89
Ogunde A. A., Nymphas E. F. , Inverse Power Lomax Poisson distribution: properties and applications in modelling negatively-skewed reliability data	111
Wesołowska M. , Exploring variation in data on income inequality across databases and measures in post-socialist countries	127

Conference Papers

XXXXII Multivariate Statistical Analysis 2024, Lodz, Poland

Kończak G. , On a new goodness of fit test for multivariate normality with fixed parameters based on David-Hellwig test idea	151
---	-----

XV Scientific Conference MASEP 2024 – Measurement and Assessment of Social and Economic Phenomena, Warsaw, Poland

Falkiewicz E. , The concept of behavioural model of decision-making under risk	167
---	-----

Research Communicates and Letters

Thakur N. S., Chaurasia S., Bhayare U. , Mean estimation based on the factor-type estimator under adaptive cluster sampling design	185
