

## CONTENTS

Submission information for authors .....	III
From the Editor .....	VII

**Original research papers**

<b>Zhang W., Wang Z., Pinsky E.</b> , Mean absolute deviations for the Weibull distribution: applications in survival analysis and insurance claims .....	1
<b>Kot S. M.</b> , The entanglement of attitudes toward inequality: the theoretical background and measurement for the EU countries in 2021 .....	15
<b>Baraka A. C., Baraka K., Rahmaoui M., Yamoul N. Bahi Y., Khalifi H.</b> , Multivariate statistical analysis of the seismic activity in Morocco using PCA and K-Means clustering .....	31
<b>Prodhani H. R., Shanker R.</b> , Power quasi Sujatha distribution with properties and applications to real lifetime data .....	53
<b>Krajčíková L., Vojtková M.</b> , Consumption patterns of Slovak households in 2021 and 2022 .....	71
<b>Boratyńska A.</b> , Bayesian sensitivity of insurance premium in collective risk model under bivariate prior with dependent frequency and severity of claims .....	91
<b>Gaire A. K.</b> , New version of Log-Logistic distribution: properties and applications to survival time and demographic data .....	111
<b>Abu Awwad R. R., Abufoudeh G. K., Alokaily S., Almheidat M.</b> , Progressive Type II censored exponential data analysis: the method comparison with a breakdown voltage case study .....	129
<b>Koczczyński B., Witkowska D.</b> , Effectiveness of bankruptcy prediction models constructed for differently selected diagnostic variables .....	145
<b>Nkpordee L., Aleshinloye Y. A., Olugbenga E. A., Osayomore I.</b> , ARIMA-LSTM hybrid model for forecasting urban temperature dynamics in Ugandan cities .....	161

**Conference papers***XXXII Multivariate Statistical Analysis 2024, Lodz, Poland*

<b>Landmesser-Rusek J.</b> , Comparison of two types of topological networks for the foreign exchange market: one based on correlation coefficients and the other on the concept of causality .....	185
---	-----

**Research Communicates and Letters**

<b>Biswal T. K.</b> , R-optimal design strategies for logistic regression models with complementary log-log link .....	205
About the Authors .....	219
